Welcome by Claudia: Claudia welcomed the participants and thanked them for their work so far. The agenda for the day was discussed and accepted. The following points were discussed:

1. First, the announcement that B. Braun Melsungen has created a database on parenteral nutrition, which is being made available free of charge in a trial version for a limited time. The participants agreed that this could be useful at a later date and is not currently a high priority.
2. Regarding light protection, Claudia reported that we have received a presentation from Ms. Vilma Hanske. Excerpts from this presentation can be used and supplemented with images from our own documentation. Claudia will incorporate this into the section on "Products in the aseptic production of patients specific preparation".
3. On the topic of total parenteral nutrition (TPN), Claudia reported that we can refer to a presentation from the German Society for Oncology Pharmacy (DGOP) prepared by Pauline Dürr.
